

Deleting Data

Scroll to "Manual" from the home screen on the instrument and press "OK". Using the right arrow scroll over till the cursor is flashing on "Edit Library" and select "OK". Press the down arrow once and then select "OK". Using the right arrow press 4 times till the screen displays "Number of Motors" and using the down arrow you can select how many test you want saved on the instrument. For example if you have 4 tests on the instrument and you scroll down to 3 it will delete the most recent test in the memory.
